Dimock –

Notable – Today at 1:30 scheduled to be the first sampling appointment.

Working on a desk statement in response to a Cabot Statement made on 1/20/12

31 sampling appointments scheduled thru the end of next week. Messages have been left at other residences.

The CICs are following up with several more people (summer residents needing to be contacted by mail, residents with disconnected phones, people who will not answer their doors and people who are not interested in sampling, but we still need to gather their info to send them registered letters).

Our Congressional Liaison & HQ counterparts are going to try to set up a briefing with Senator Inhofe's staff on Dimock. Senator has questions.

The ERRS contractor contacted all 4 residents that had been supplied water to see if they needed either more bottled water or a bulk delivery. Only one resident needed a bulk delivery (their tank is 1/2 full now). ERRS is arranging a delivery first thing Monday morning. In the future, the plan will be to leave the water truck on site unless it needs to go back to Easton for refilling. That will help the logistics for what will likely be daily delivery of water. One resident has a smaller tank (250 gals.) that will be replaced to reduce the frequency of refilling.

The lab trailer will be used for sample management and will be operational for the beginning of the sampling today.

As previously noted, one resident's plumbing is being changed over to the water buffalo from their contaminated well.

Security for the command post is still being sought. The OSC will reach out to Susquehanna County EMA for assistance.
